MINUTE PROMISE

OPTIONS

We offer both new and used spotters for sale, provide full service leasing on any make or model with maintenance contracts and provide rental options for those who are looking for a short-term solution.

Features Include:

- Modular design for ease of serviceability
- Heater with integral A/C
- Air ride suspension
- AM/FM radio
- Bluetooth capabilities

LEASING

Depending on your business and your needs, we can accommodate you, like adding (or removing) services as part of your lease. Let us know how we can customize your lease.

To help you keep your business growing, we offer terminal tractor leasing. The “Every 2 Get New” program allows you to replace your leased tractors every two years, with a new one, making this program budget-friendly and cost effective.

Whether it's a short or long-term need, Yancey gives you the flexibility to rent the terminal tractors you need to keep your trailers moving. Once you place your order and select your rental duration, your equipment will be on the road. Renting a terminal tractor from Yancey gives you piece of mind knowing that 24/7 mobile service is available if you need it. Daily, weekly and monthly rental options are available.

RENTALS

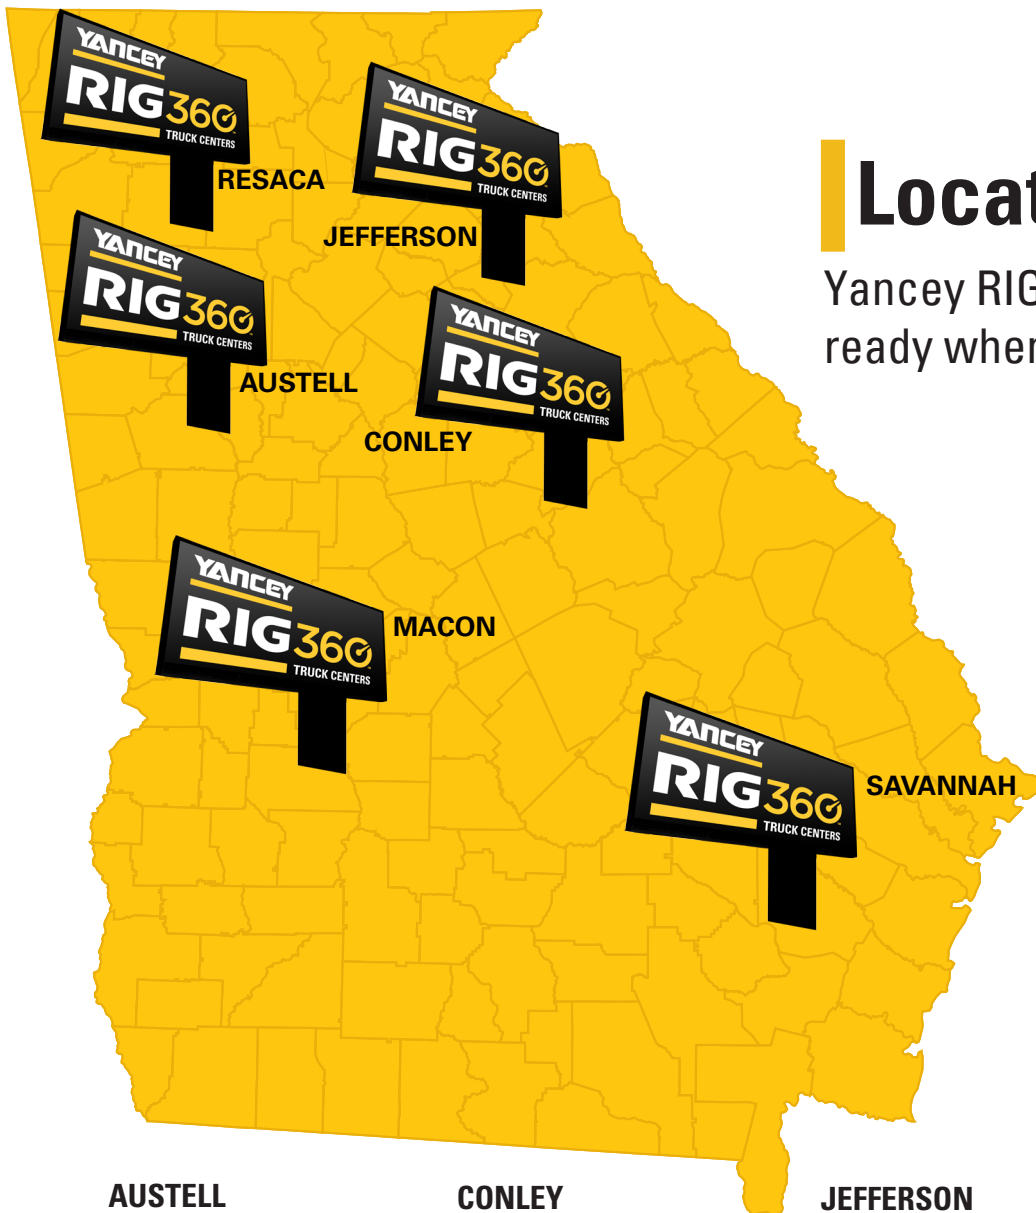

Parts availability should never be a concern as a Yancey Truck Center customer. We carry all makes & all model parts at all seven locations including Kalmar, Capacity, AutoCar, TICO® & Hoist. No matter your location or your make we will service your terminal tractors. As a certified Cummins® dealer, we can provide Cummins warranty support on all makes of terminal tractors.

SERVICE & SUPPORT

Yancey will tailor a quote to fit your specific needs. Our custom refurb service allows you to decide what you want repaired or replaced after an initial inspection is completed. A bumper-to-bumper inspection determines the necessary repairs including, a full fluid sample analysis for the engine, transmission, differentials and fuel. Based on the inspection results, interior and exterior cosmetic repairs and cleaning or a complete rebuild/replacement of engine, transmission and drive train components will be done. Sandblasting and painting of the cab and frame, hydraulic system overhaul (including pumps, cylinders, valves and hoses), as well as axle component rebuilds, are also included. Ask about an extended warranty.

REFURBISHMENT
